

eSMART 21, an ECIC ThIncLab incubator business, is seeking for technical assistance for their recently developed automated parking system. This system provides smart parking management solutions to service providers. Further details can be found at <http://www.esmart21.com.au/index.php/products/apms>.

eSMART 21 is looking for two final year students with electrical/electronic engineering background who can help during a trial run at one of their clients' parking area early January 2012. This could be a great opportunity to pick up industry experience during summer break.
